**Certificate**  
APR 19 2006  
**of Correction**

REQUEST FOR CERTIFICATE OF CORRECTION OF PATENT  
FOR PTO MISTAKE (37 C.F.R. 1.322(a))

Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

ATTENTION: Decision and Certificate of Correction Branch  
Patent Issue Division

Sir:

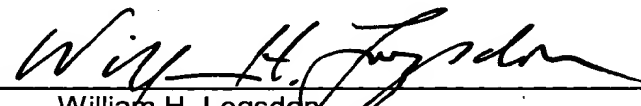

In accordance with 35 U.S.C. §254, we attach hereto Form PTO/SB/44 and a copy of proof of PTO's error and request that a Certificate of Correction be issued in the above-identified patent. The following error appears in the patent as printed:

Column 13, Line 53, Claim 13, "object oriented the control" should read:

-- object oriented class;  
the control means issues... --

Respectfully submitted,

THE WEBB LAW FIRM

print means connected to the control means, the print means printing data on print media in response to receiving commands from the control means, wherein:

the control means is responsive to the one or more printerlets for causing at least one object oriented class to be invoked for processing the data;

the control means processes the data as a function of the invoked object oriented class; and

the control means issues commands to the print means as a function of the processing of the data.

13. (currently amended): ~~The printer as set forth in claim 12, wherein:~~

A printer connectable to one or more computers, the printer comprising:

control means connected to one or more computers for receiving therefrom one or more printerlets and data;

5 computer storage means connected to the control means and storing therein a plurality of object oriented classes invocable by the control means, each object oriented class configured to control at least one operation of the printer; and

print means connected to the control means, the print means printing data on print media in response to receiving commands from the control means, wherein:

10 the control means is responsive to the one or more printerlets for causing at least one object oriented class to be invoked for processing the data;

the control means processes the data as a function of the invoked object oriented class;

15 the control means issues commands to the print means as a function of the processing of the data;

the control means invokes a port monitor class which monitors for incoming data including printerlets and data;

in response to detecting a printerlet in the incoming data, the port monitor class causes the control means to invoke an interpreter for interpreting the printerlet;
